No problem. I've spoken to Steve Lawry many times in the past.. Recently his wife, Mary, was given access to NetDMR test environment. I'm hoping she has gotten familiar with the screen but I haven't heard from her. I will be out tomorrow. Sometime next week will work.

Subject: FW: DMR information request

Hi, Sandra – FYI. If we have a call with Steve and his clients, I'd like you to join us. Your perspective on exactly where we should draw the line (how exactly any custom form must replicate the preprints) will be crucial. We should probably chat briefly before the call (once it's scheduled), so Eugene and I know your position on that.

Subject: RE: DMR information request

Hi, Steve –

If one of your clients has shared a copy of its information request with you, please take a look at the options listed. There is critical coding information provided on the preprinted DMRs that has been missing from submittals, and we need each of these permittees to select one of the three options for the remainder of the permit term (which extends over the next 4 ½ years). Without the information, it is extremely difficult to match up reported values with permit limits in our system. There are also issues with how information is being consolidated within a given page. It appears that information has been consolidated to save space and paper, which I can understand – these are long reports. But the timeframes for which information is being reported need to be crystal clear on each page, and consolidating the information is frequently not going to be helpful from our perspective.

Perhaps we should have a call. I would feel more comfortable talking with you if one of your clients attended... they are our permittees, after all, and we have no direct relationship with you. Let me know if you're planning on coordinating such a call, and get it on the calendar ASAP.

Thanks,
Kristine

Subject: DMR information request

Hi Kristine. I have several clients (FM O&G, Beta Offshore, POOI, Venoco) that have received word that you are requesting additional information in the DMR forms being submitted. When you have a minute, can you call me to discuss what you need. It was my understanding the current forms that I assist my clients in filling out would need a code number included and I wanted to know if I include the code number on our forms from Sandra Chew's March DMR form mailings, that would be adequate. That would be a lot easier then converting over to a new DMR format which is much more lengthy. Plus, the NetDMR may be mandated next year so it would be a lot easier on the industry if we could make minor change until then.

Thank you so much and I look forward to hearing from you.
